

Harvest Creek Community Update

August 2024

www.VillageonHarvestCreek.com

WOW!! August already....

Tree Trimming:

As the years go on, trees and shrubs continue to grow. As a result, our amount of trimming has increase from previous years. Now through the fall, tree and shrub trimming will continue to occur in common element areas. This will include cutting branches hanging over the fence areas from trees on neighbouring properties.

Dollar Spots:

You may have noticed yellow spots on some lawn areas within the complex. These are "Dollar Spots". It is a fungus that cannot be sprayed by our weed control vendor Tru Green, due to strict rules for fungicide chemical usage in Canada. Dollar Spots subside in September. To learn more about Dollar Spots, click here:

Driveways:

If you've recently have had your driveway sanded with polymeric sand, it is very much appreciated. Why do we keep reminding about driveways maintenance? It's because everyone's monthly maintenance fees are lowered by reducing reserve fund costs. Future driveway replacements are a shared common element cost that can be delayed by proper driveway maintenance. So, let's each keep doing our part.

Contractor Signs:

If you have any contractor doing work at your home, many times they like to place signs promoting their business on your front yard. Please ask them not to do this, as our community has opted not to have these types of signs displayed. Thank you to those who've had contractors understand and assist in upholding this request.
